

# ParityFactory

## End-to-End Control for End-to-End Benefits

System features focus on delivering exactly what food operations need at each level of the operation—making ParityFactory an asset to your teams, not a burden. Each part works in harmony with the other so life is easier whether you spend your days on a forklift, managing operations, or talking to customers.

### For Plant Workers

- An easier, safer and less stressful job—With simple, laser-focused mobile apps
- Error-free shipping, receiving and production—With easy to follow steps on mobile scanning devices using barcode tracking software
- No more distracting paperwork or logging—With fully automated electronic data collection

### For Plant Operations

- Know what's going on in your plant—With real-time barcode inventory management software providing real-time processing reports
- Be a first-class food producer—With secure, trusted material control and traceability
- Cut costs and simplify operations—By going paperless—reduced errors, delays, and manual data entry

### For Office Staff

- Get the full value of your business (ERP) system—By automatically feeding it with real-time inventory data
- Easily communicate with the factory—With receiving, production, and shipping instructions fed electronically to shop floor devices
- Reduce reliance on excessive inventory—With live and accurate views of stock levels

### For Customers & Sales Team

- Assure on-time, accurate shipments—With directed picking, shipping, and loading
- Guarantee trusted materials control—With instant end-to-end tracing and accurate labeling
- Improve responsive service—With clear, real-time visibility of stock levels and production
