

ParityFactory

Materials Control, Made Simple.

Designed for Food Processors, Built for the Factory, Delivered in Person

ParityFactory simplifies materials control in meat, poultry, and seafood production plants—making life easier for shop floor workers. Plant managers gain accurate inventory reports. QA gets fast, secure, and automatic lot tracing. Combining modern software, hardware, and services, ParityFactory automates the tracking and management of materials as they flow from receiving through shipping.

Instant Lot Tracing

- Guarantee tracing & labeling standards
- Easily manage quality & safety holds
- Stress free tracing audits

Real-Time Inventory

- Make better planning decisions
- Maintain lean stock levels
- Trust your inventory balances

Paperless Shop Floor

- Cut labor costs
- Eliminate shipping, receiving & production errors
- Keep workers focused on their jobs

Modernizing your materials control can be easy and fast.

- All Inclusive Solution & Services
- Fixed Cost, Unlimited Users
- Integrates with Business Systems
- Food Expert Team On-Site
- Up & Running in Under 90 Days
- ROI in Months

A Simple Solution for Your Complex Meat Processing Operation

Yields and Loss Control

Track yields and monitor scrap, waste, and pack-mix in real time. Control materials through production and shipping with a seamless chain of custody.

GS1 and Custom Labels

Intelligent labels promote efficiency and customer service. GS1 labels are recognized during receiving and can be tailored to customer specs for shipping.

Breakdown Processing & Value Added Production

Designed for breakdown processing as well as multi-step, multi-ingredient product production. Track and trace work-in-process and intermediate production to multiple finished goods.

Flexible Units of Measure

Track your product by weight, unit, carton, and more, simultaneously, even if your ERP doesn't. Weight, units, and units-of-measure are customized to your system.

Planning, Scheduling and Order Execution

Efficient order scheduling, picking, and staging let you plan production and address resource shortages and procurement for optimal customer service.

Quality Holds

Simple and secure quality logistics let you manage automatic pre-test holds, quality and safety holds, timed chiller and freezer holds, and positive release to production and shipping.

Tracing and Recall Execution

Food safety compliance made easy. Forward and backward tracing and instant recall execution for both simple and complex production.

Wholesale Distribution

Seamless integration of your production and wholesale operations with easy tracking for box-in-box-out distribution. Receive, store, and manage purchased inventory with FIFO and location tracking.

Integration

Quickly integrate with your current ERP or accounting system and factory weigh and label equipment for an intelligent, real-time business operation.

“

The system was so easy to implement on the shop floor, the staff was trained in less than one afternoon and we received excellent support from the project team at Parity.

Tonya Metz,
Schiltz Foods, Poultry Producer
